

## Peer Review Process:

Peer review process increases the robustness of the paper and increases the quality of the paper. It is the process in which subject related expertise review the paper and suggest the modifications if required which is done by the related authors which increases quality of article and journal. IP Innovative Publication Pvt. Ltd. carries double blind review process in which authors and the reviewers are not aware from each other, which does not include any partiality which is beneficial for authors as well as reviewers. Every article submitted to the journal is subjected to strict plagiarism check through software.

- Submission of article
- First rejection criteria
- Plagiarism check
- Sent to the reviewer
- Send to the editorial board member
- Accepted
- Selection for publication

### 1) **Submission of article:**

Article submitted by the author should be according to the authors guidelines, like in research article there should be maximum 4000 words, a case report should contain maximum 3000 words, etc. for complete guidelines click here.
